FLOWFIDELITY FILMS > www.flowfidelity.com

In 2011 a film student, a sound engineer and a graphic designer (me) founded Flowfidelity films. We were aware of the world that we have had to transform. The news is always talking about economic crises and budget cuts. We see transformation in these concepts. A renewal of the standard sets in another era that is no longer present, and therefore, trying to change the present without changing us as a creators wouldn't make sense. Flowfidelity = "Flow" + "Low-fi" + "Fidelity".
